LITERATUROVERZICHT POLLINEX®

Placebo Controlled (double blind) Studies

   A multicentre controlled trial of Pollinex treatment of hayfever and pollen asthma. Polish Medical Weekly 34: 1111-1113. [Polish: English translation supplied].

6. Metzger W J et al. (1981). -

   Pollinex-Parietaria Clinical Trial of Allergoids of Parietaria Judaica.

10. **Report Ref: 783 4389 (1978).**

    Characteristics of hay fever during pollen season with regard to the influence of specific immunotherapy. I. Clinical course and biochemical changes in nasal lavage. [Polish] Pneumonol Alergol Pol 63:135-143

    Course of hay fever during the pollen season with respect to the effect of specific immunotherapy. II, Cytologic changes and chemotactic activity in nasal lavage. [Polish] Pneumonol Alergol Pol 63:144-152

**Controlled Trials**

    Treatment of hay fever with a pollen-L-tyrosine complex (Pollagen®). Schweiz Rundschau Med (PRAXIS) [French; German translation available]

    Glutaraldehyde-pollen-tyrosine; Clinical and immunological studies. Clinical Allergy 4: 255-263.

15. **Foucard et al (1976).**
    Immunological studies *in vitro* and *in vivo* of children with pollenosis given immunotherapy with an aqueous and a glutaraldehyde-treated tyrosine-adsorbed grass pollen extract. Clinical Allergy 6: 429-439.

16. **Miller ACML (1976).**

17. **Jarisch R (1977).**
    Glutaraldehyde-pollen-tyrosine-hyposensitization, control of the therapy success by RIST and RAST. Der Hausarzt 28: 185-187 [German]

18. **Horak F (1977).**
19. **Symington I S et al (1977).**

20. **Horak F et al (1978).**

21. **Verstraeten J M et al. (1978).**

22. **Horak F et al (1979).**
Specific hyposensitization with grass boostering in pollinosis cases, Allergologie2:81-86.[German]

23. **Skoda-Türk et al (1980).**

Results after 1-3 year hyposensitisation with tyrosine-allergoids. Comparison with aluminium-adsorbed solutions. Prax Pneumol 35: 71-75.[German: English translation supplied].

25. **Kuhn W et al (1983).**
Advantages of a higher dose regimen in hyposensitization with grass and rye allergoid in pollinosis. KlinPadiat195:411-414. [German]

26. **Urbanek R et al (1983).**
Efficacy of oral and parenteral hyposensitization with pollen extracts DtschMed Wochenschr 108: 1433-1437.[German]

27. **Horak F et al (1987).**
Oral hyposensitisation with enteric-coated allergens as extension therapy following a basic subcutaneous course of injections Int Archs Allergy appl Immun 84: 74-78.
   IgG and IgE antibody responses to treatment with modified ragweed tyrosine adsorbate. Ammls Allergy 59: 441-449.

   Hyposensitization against pollens during the entire year or preseasonal? Allergologie 10: 183-187.[German]

   Combination of parenteral and oral immunotherapy in grass pollen-allergic children Allergy 44: 272-280.

   Comparison of the efficacy and side effects of aqueous steroid nasal spray (budesonide) and allergen-injections therapy (Pollinex-R) in the treatment of seasonal allergy rhinoconjunctivitis. J Allergy Clin Immunol 85: 606-611.

   About hyposensitisation of pollinosis. Schweiz. Rundschau Med (PRAXIS) 79: 430-436.[German]

   A reduction in allergen-induced Fee R2/CD 23 experssion on peripheral B cells correlates with successful hyposensitisation in gram pollinosis. J. Allergy Clin. Immunol 95: 77-87
Comparison of the efficacy and safety of two preseasonal regimens of glutaraldehyde modified, tyrosine-adsorbed *Parietaria* pollen extract over a period of three years in monosensitive patients. Allergol et Immunopathol 27(3): 153-164

The influence of a three-year preseasonal specific immunotherapy on selected parameters of allergie inflammation in pollinosis patients. [Polish] Pneumonol Alergøl Pol 70: 78-86

Non-Controlled Trials

Modified grass pollen tyrosine allergen adsorbate vaccine in the treatment of allergie rhinitis and bronchial asthma. Proc Eur Congr Allergy Immunology London Abstr no 97.

Leucocyte migration inhibition test in the allergological diagnosis of pollen asthma taking into account the results of desensitization treatment Polski Tygodnik Lekarski 24: 909-911. [Polish]

52. Schreyer H (1980).  
Results of a multicentre study for the hyposensitisation of pollinosis patients with a tyrosine-adsorbed grass and rye pollen extract, (TA tyrosine allergoid-grasser pollen). Sonderdruck Allergol. 2: 3-24.

The results of a three year hyposensitisation with L-tyrosine-pollen-allergoid. Allergologie 4: 36-42.

   Clinical and serological observations on the depot hyposensitization of patients with pollen allergy. Allergologie 5: 283-289. [German]

   Desensitisation of pollinosis patients with Tyrosine-adsorbed grass and rye pollen allergoid. Allergologie 7: 222-228. [German: English translation supplied].

   Desensitisation with tyrosine adsorbed tree pollen allergoid. Results of immunological investigation. Allergologie 11: 68-81. [German: English translation supplied]

**Safety Studies**

   Experiences in specific immunotherapy with Conjuvac 3- grass mixture, Conjuvac house dust mite D. pt, and TA-tree pollen. Compatibility and handling of these new products in practice; Allergologie 9: 78-82. [German]

76. Committee on Safety of Medicines (1986).

   Immunotherapy. Position Paper of the European Academy of Allergology and Clinical Immunology Allergy 48: Suppl. 14: 9-35

82. Periodic Safety Update Report (PSUR) 1992 -2002 12 grass, 13 grass & 3 Tree MATA
